## WORK EXPERIENCE

**DevOps Markaz Technologies, Pakistan | Jan 2023 - Present**

**Backend Developer** - Cycle from development till deployments.

- Used node and express.js to do the server side - Backend
- Designed & Developed REST APIs
- Third party integrations - Stripe, MailGun etc.
- Used MongoDB as database
- Improved overall project structure for better code readability
- Worked in Agile process, used Jira for tasks management

## TOOLS & TECH

Node | Express

VS Code

Github | Git

Javascript

PostgreSQL

MongoDB

## PROJECTS

### PizzaLicious - A pizza delivery web application

PizzaLicious is a web application for a pizza chain with the purpose to automate the whole business. Implemented RBAC (role based access control), integrated stripe payment and mailgun to send emails.

<https://github.com/umerkhayyam91/pizza-base-backend>

### Stripe-Payment-Integration

Complete implementation of stripe payment using both the stripe's prebuilt checkout page and custom payment with functional webhooks to receive stripe events.
